Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

In The Drawings:

The drawings filed on 27 August 2003 are acceptable subject to correction of the informalities: the drawings do not include the following reference sign(s) mentioned in the description: inner member 69 (see page 6); reference character “36” has been used to designate both post and plunger; reference character “26” has been used to designate both sleeve portion and middle portion. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

In The Specification:

On page 1, line 12, “snd” should be changed to --and-- after “tip leather”; on page 2, line 8, the second occurrence of “.” should be deleted after “cue tip”; on page 2, line 13, “comprises” should be changed to --comprise-- after “may”; on page 4, line 18, “hosing” should be changed to --housing-- before “portion 12”; on page 5, line 2, it appears that “post 36” should be --post 40--; on page 6, line 3, “inner member 69” is not shown in the drawings; on page 6, line 5, “housing portion 26” should be changed to --middle housing portion 26--; on page 6, line 7,

Art Unit: 3711

"housing portion 12" should be changed to --bottom housing portion 12--; on page 8, line 2, --a-- should be inserted before "o.32 music wire"; on page 9, line 1, "has" should be changed to --have--; on page 9, line 9, the first occurrence of "32" should be changed to --30--.

NOTE: The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

In The Abstract:

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to **a single paragraph on a separate sheet within the range of 50 to 150 words.** It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

In The Claims:

Objection is made to the claims under 37 CFR 1.75 as containing minor informalities, which are noted as follows:

In claims 3, lines 1 and 2, in order to better define the claimed limitation, it is recommended that --relative strength of-- be inserted after "wherein".

In claim 4, line 2, a unit of measurement should follow "0.050 music wire". It should be noted that the same would also apply in the specification.

In claim 9, line 1, a unit of measurement should follow "0.050 centers". It should be noted that the same would also apply in the specification.

In claim 9, line 1, applicant has inadvertently left out the dependency of the claim. Therefore, it is unclear which claim, claim 9 is dependent from?

NOTE: Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the claims.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
